

Choose **Ecosia** for your company

Boost your green credentials and **effortlessly plant trees** in over 35 countries for free.

Trees

Support verified tree-planting projects across the planet's biodiversity hotspots and beyond.

Measure the impact

Receive data about the collective impact of employees' searches via a regular tree report.

Employee engagement

Inspire the whole workforce to take daily climate action and contribute to your sustainability goals.

Your team searches. We plant trees.

Over the past 15 years our team of reforestation experts has planted **over 200 million trees** across the planet's biodiversity hotspots.

What sets us apart?

100% of profits for the planet

We invest 100% of our profits into climate action. Our business model means that our shares cannot be sold.

We protect your privacy

We care about trees, not your data. You can tailor your level of personalization, but whatever you choose, we never store your search history.

Taxes & transparency

We are the largest European search engine. We pay our taxes and publish monthly financial reports.

Renewable energy

Our solar systems produce enough clean energy to power all searches twice over. Each search crowds out dirty energy from the grid.
