

Google results on **Ecosia** are now here!

Your university can make a difference:

Hundreds of organizations around the world already use Ecosia – the search engine that plants trees. By switching the standard search engine to Ecosia on campus, your university can help plant hundreds of thousands of trees each year – for free!

From now on we deliver Google results:

We're delighted to share the exciting news that we're now serving Google search results through Ecosia to all companies that use us. This partnership offers you many great benefits while increasing your university's climate impact even more.

What's new on Ecosia?

Improved search experience based on Google results

Planting more trees than ever before

What stays the same?

- ✓ Helping to plant trees while you search the web
- ✓ Supporting local communities and endangered animal species
- ✓ Restoring the planet's biodiversity hotspots
- ✓ Monthly tree report for your campus
- ✓ Protecting your privacy while you search

Our promise:

Ecosia is the easiest way to take climate action every day. We dedicate 100% of our profits to planting trees and building a sustainable future - no compromises.

Thank you for joining the world's largest tree-planting community!

See how Telekom has championed Ecosia at their offices:

"Switching to Ecosia was a journey for us, but one that we believe makes a difference. At Deutsche Telekom, we are proud to protect both the environment and our data."

Alex Ziemer
ChangeMaker at Telekom

Want to find out how many trees your university could potentially plant?
