

ECOSIA

The greenest way to search

Why Ecosia?

We are the **largest purpose-driven search engine** and the easiest way for universities to take climate action.

Free to use and simple to implement. A university with **5,000 people** can plant an estimated **48,000 trees** over the course of a year.

Trees

Effortlessly help finance tree-planting projects in over 35 countries around the world.

Measure the impact

Receive data about the collective impact of your searches via a regular tree report.

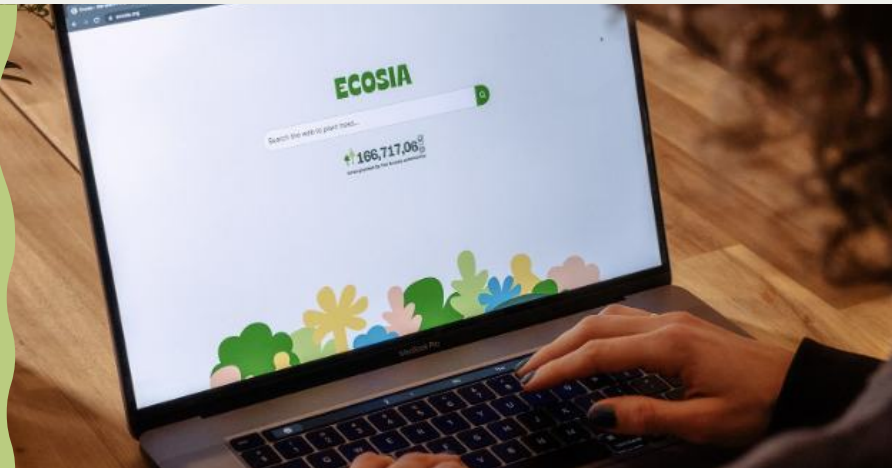

Campus engagement

Inspire the whole campus to take daily climate action and contribute to your sustainability goals.

Your team searches. We plant trees.

Over the past **12 years** our team of reforestation experts has planted **over 200 million trees** across the planet's biodiversity hotspots and beyond!

What sets us apart?

Privacy

Fully GDPR compliant and a more privacy-friendly way to search

Renewable energy

Our solar farm produces three times as much clean energy than what's needed to power our servers.

Purpose model

We invest 100% of our profits into climate action. Our business model means that our shares cannot be sold.

Taxes & transparency

We pay our taxes and publicly publish financial statements each calendar month.
